INSTRUCTIONS TO STUDENTS

1. This question paper consists of **FOUR** questions with **ELEVEN** printed pages excluding the cover page. Page 9 and 10 is the Normal table. Page 11 is the formula list.
2. Answer **ALL** FOUR questions. All necessary working steps **MUST** be shown.
3. Students are **NOT** allowed to take this question paper out from the exam venue. It is your responsibility to make sure that this paper is submitted at the end of the exam.

Question 1 [15 marks]

a) The ninth term of an arithmetic sequence is 35 and the sum of the first eleven terms is 253. Find the first term and the common difference. [3 marks]

b) Express the repeating decimal $0.\overline{37}$ as a fraction. [3 marks]

c) Find the term that contains x^5 in the expansion of $(3x+y)^{15}$. [2 marks]

Continue...

d) Given the following system of linear equations:

$$\begin{aligned} x+2y-z &= 2 \\ x+z &= 0 \\ 2x-y-z &= -5 \end{aligned}$$

Find the inverse matrix by using its adjoint, and hence solve the system of linear equations by using inverse method. [7 marks]

Continue...

Question 2 [10 marks]

a) Find the angle between the planes $2x-y-3z=-9$ and $-x+3y+z=8$. [3 marks]
[You must write your final answer to 2 decimal places for this question]

b) Find an equation of the plane that contains the line $x=2-3t$, $y=-2+t$, $z=-1+2t$ and is parallel to the plane $2x-3y+z=2$. Give your final answer in the form of $ax+by+cz=d$. [3 marks]

Continue...

c) Find the parametric equation for a line passing through $(5,-1,2)$ and orthogonal to both $\mathbf{i}+\mathbf{k}$ and $\mathbf{j}-2\mathbf{k}$. [4 marks]

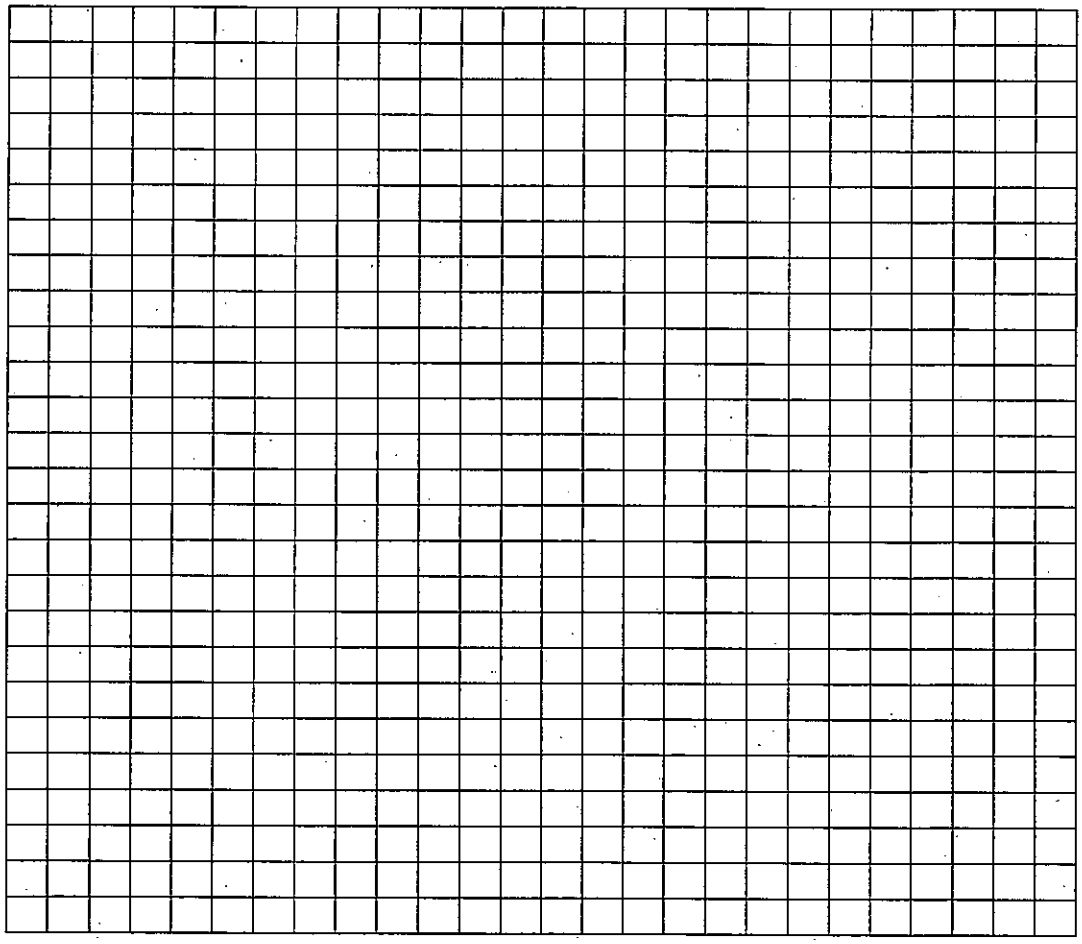
Continue...

Question 3 [10 marks]

The time spent to complete a test collected from 40 MMU students is given below:

Time (minutes)	Number of participants
40 – 44	4
45 – 49	2
50 – 54	10
55 – 59	6
60 – 64	11
65 – 69	7

a) Sketch the Ogive for the above dataset. Ensure full labels and readability. [3 marks]



Continue...

b) Half of MMU students spend more than k minutes on this test. Find the value of k.
[You must write your final answer to 2 decimal places for this question]
[3.5 marks]

c) Most MMU students spend x minutes on this test. Find the value of x. [3.5 marks]
[You must write your final answer to 2 decimal places for this question]

Continue...

Question 4 [15 marks]

a) A box contains 5 white and 7 yellow balls. Four balls are selected at random from this box.

i) Find the number of ways that at least 3 yellow balls are selected. [3 marks]

ii) Calculate the probability that all the selected balls have the same color. [4 marks]

b) The weight of MMU students is normally distributed with a mean of 60 kg and a variance of 5 kg.

i) What is the probability that a randomly selected MMU student is weigh between 57 kg and 68 kg? [4 marks]
[You must write your final answer to 2 decimal places for this question]

Continue...

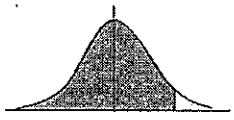
ii) Eighty-five percent of MMU students weigh more than y kg. Find the value of y.
[You must write your final answer to 2 decimal places for this question]

[4 marks]

End of Questions.

Standard Normal Distribution

The Normal Distribution Function



$$p(z \le z_1) = \frac{1}{\sqrt{2\pi}} \int_{-\infty}^{z_1} e^{-\frac{1}{2}z^2} dz$$
